THE BUTTERFLIES OF GREECE

An update of distribution Maps, Plates and Diagrams 3.3,
in Map 3.4, in Chart 4.15 and in Chart 4.16
by Lazaros N. Pamperis

2026

ΠΡΟΛΟΓΟΣ

Στις επόμενες σελίδες παρουσιάζονται επικαιροποιημένοι 236 χάρτες εξάπλωσης των ειδών δηλαδή οι Χάρτες, Διαγράμματα και Πίνακες 3.3, ο Χάρτης 3.4 (στην σελίδα 40 της δεύτερης έκδοσης του βιβλίου ΟΙ ΠΕΤΑΛΟΥΔΕΣ ΤΗΣ ΕΛΛΑΔΑΣ, 2009), ο Χάρτης 4.15 (στην σελίδα 736) και ο Χάρτης 4.16 (στην σελίδα 738).
Η επικαιροποίηση αυτή αφορά συνολικά 551660 καταγραφές για τις πεταλούδες της Ελλάδας (που συγκεντρώθηκαν μέχρι 31 XII 2025) και συνολικά 1786 τοποθεσίες 6'X6′ , που έχουν εξερευνηθεί, από τις συνολικά 2059 τοποθεσίες 6'X6′ για όλη την επικράτεια, δηλαδή καλύπτοντας το 86.74% της επικράτειας (αντίστοιχα 265134 καταγραφές, 1260 τοποθεσίες 6'X6′ και το 61.19%, το 2008).
Αυτή η αύξηση των καταγραφών οφείλεται στις προσωπικές εξερευνήσεις (από το 2008-2026) αλλά κυρίως στις δημοσιευμένες εργασίες σε εντομολογικά περιοδικά και στην αποστολή (μετά την δεύτερη έκδοση του βιβλίου) σχολίων και καταγραφών για τις πεταλούδες της Ελλάδας από πολλούς, από την Ελλάδα και το εξωτερικό, των οποίων τα ονόματα αναφέρονται παρακάτω. Σε όσους προσέφεραν τα σχόλια και όσους εμπιστεύθηκαν τις καταγραφές των, αφιερώνεται το παρόν μαζί με την ευγνωμοσύνη μου.
Επισημαίνεται η ανάρτηση πολλών φωτογραφιών και καταγραφών σε ιστοτόπους (μερικές διευθύνσεις των οποίων αναφέρονται παρακάτω) και ιδιαίτερα στην ομάδα του Facebook για τις πεταλούδες της Ελλάδας και της Κύπρου (Butterflies & Moths of Greece & Cyprus με 4211 μέλη την 20 XI 2025) στο http://www.facebook.com/groups/420659294633829/ .
Τώρα στην Ελλάδα υπάρχουν 236 είδη πεταλούδων σύμφωνα με το Wiemers et al (2018) στο https://doi.org/10.3897/zookeys.811.28712 και το Zhang et al (2020) στο https://www.ncbi.nlm.nih.gov/pmc/articles/PMC80l8707/
Οι αναφορές για την παρουσία των ειδών Thaleropis ionia (Καστελόριζο), Deudorix livia (Αττική) και Hipparchia semele (Πελοπόννησος και Ιωάννινα) δεν έχουν επιβεβαιωθεί έως σήμερα.
Σε ορισμένες από τις σελίδες, που ακολουθούν, παρουσιάζονται κατά περίπτωση εάν απαιτείται, και πρόσθετα διευκρινιστικά σχόλια και σύνδεσμοι (Links) για ιστοσελίδες με φωτογραφίες και λεπτομέρειες των φτερών, που προτείνονται ως χρήσιμες για αναγνώριση των ειδών με τις φωτογραφίες.
Για επιπλέον 165 νέες φωτογραφίες και περισσότερες λεπτομέρειες στο URL: https://www.pamperis.gr στις 6 ελεύθερες εφαρμογές στο https://www.pamperis .gr/btf_site/ και στο https://www.pamperis.gr/recognition/index.html για την αυτόματη αναγνώριση των πεταλούδων.

Λάρισα 1 Ιανουαρίου 2026
Λάζαρος Ν. Παμπέρης

PREFACE

An update of distribution Maρs, Plates and Diagrams 3.3, in Maρ 3.4 are presented (in page 40 of the second edition of the book THE BUTTERFLIES OF GREECE, 2009), in Chart 4.15 (in page 736) and in Chart 4.16 (in page 738).
This update is made after in total 551660 records for the butterflies of Greece (till 31 XII 2025) for a total number of 1786 investigated localities 6'X6′ ; this is the 86.74% of territory of Greece, a part of all 2059 localities 6'X6′ all over Greece (compared to 265134 records, 1260 localities 6'X6′ and 61.19% in 2008).
This increase in records is made after personal investigations (from 2008-2026) and mainly after the many published papers in entomological magazines and the generous offer from many recorders (listed below) from Greece and abroad, who send comments and records for the butterflies of Greece. This update is dedicated to all those who offer their comments and send and trust to me their records; to all I express my gratitude.
A list with a number of sites (from which records for the butterflies of Greece were obtained) is presented; the existence of a group for the butterflies of Greece and Cyprus is also noted (with 4211 members at 20 XI 2025) in http://www.facebook.com/groups/420659294633829/
Now in Greece there are 236 species; see Wiemers et al. (2018) https://doi.org/ 10.3897/zookeys.811.28712 and Zhang et al in https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8018707/
Reports on the presence of the species Thaleropis ionia (Kastellorizo), Deudorix livia (Attiki) and Hipparchia semele (Peloponnisos and Ioannina) has not been confirmed to date.
Additional comments are noted in some of the pages; also there are Links to web pages with photos and details of the wings, suggested for a correct identification from photos.
For 165 new photographs, 6 free applications and more details see in URL: https://www.pamperis.gr and in https://www.pamperis.gr/btf_site/ and in https://www.pamperis.gr/recognition/index.html for automatic recognition of butterflies.

Larissa 1 January 2026

Comments on the species distribution maps that follow
Σχόλια για τους χάρτες εξάπλωσης των ειδών που ακολουθούν

1. Endenic species/ Ενδημικά Είδη
    - *Zerynthia cretica*
    - *Kretania psylorita*
    - *Maniola chia*
    - *Hipparchia cretica*
    - *Coenonympha thyrsis*
    - *Hipparchia christenseni*
    - *Polyommatus timfristos*

2. Identification uncertain / Αμφίβολη αναγγνωριση
    - *Pieris napi*
    - *Pieris balcana*
    - *Colia erate*
    - *Leptidea sinapis*
    - *Leptidea juvernica*
    - *Melitaea athalia*
    - *Melitaea aurelia*
    - *Hipparchia senthes*
    - *Hipparchia volgensis*
    - *Pyrgus alveus*
    - *Pyrgus armoricanus*
    - *Muschampia orientalis*
    - *Muschampia floccifera*

3. Species reported only once / είδη που αναφέρθηκαν μόνον μια φορά.
    - *Thaleropis ionia*
    - *Deudorix livia*
    - *Hipparchia semele*

4. *Polyommatus ripartii*
    - As published by VISHNEVSKAYA MS, SAIFITDINOVA AF, LUKHTANOV VA (2016): Karyosystematics and molecular taxonomy of the anomalous blue butterflies (Lepidoptera, Lycaenidae) from the Balkan Peninsula. Comparative Cytogenetics 10(5): 1–85. https://doi.org/10.3897/ CompCytogen.v10i5.10944, the new endemic species Polyommatus timfristos was found in Mt Paranssos and Mt Tymfristos, very similar (in external characters) to P. ripartii. All records of P. ripartii, in this map, should be revised because of the possibility that new cryptic species is hidden.
    - Όπως δημοσιεύθηκε στο VISHNEVSKAYA MS, SAIFITDINOVA AF, LUKHTANOV VA (2016): Karyosystematics and molecular taxonomy of the anomalous blue butterflies (Lepidoptera, Lycaenidae) from the Balkan Peninsula. Comparative Cytogenetics 10(5): 1–85. https://

doi.org/10.3897/ CompCytogen.v10i5.10944, το νέο είδος Polyommatus timfristos βρέθηκε στα βουνά Παρνασσός και Τυμφρηστός, το οποίο είναι πάρα πολύ όμοιο με το P. ripartii (στα εξωτερικά χαρακτηριστικά). Όλες οι καταγραφές του P. ripartii, σε αυτόν τον χάρτη, θα πρέπει να επανεξεταστούν επειδή υπάρχει η πιθανότητα να υπάρχουν και άλλα κρυπτικά είδη.

5. *Polyommatus aroaniensis*
   - It was published recently [by Parmentier L, Vila R, Lukhtanov V (2022) Integrative analysis reveals cryptic speciation linked to habitat differentiation within Albanian populations of the anomalous blues (Lepidoptera, Lycaenidae, Polyommatus Latreille, 1804). Comparative Cytogenetics 16(4): 211-242. https://doi.org/10.3897/ CompCytogen.v16.i4.90558] that a new cryptic species Polyommatus lurae was found in Albania, very similar (in external characters) to P. orphicus eleniae and P. aroaniensis. All records of P. aroaniensis, in this map, should be revised because of the possibility that new cryptic species is hidden.
   - Δημοσιεύθηκε πρόσφατα [στο Parmentier L, Vila R, Lukhtanov V (2022) Integrative analysis reveals crypticspeciation linked to habitat differentiation within Albanian populations of the anomalous blues (Lepidoptera, Lycaenidae, Polyommatus Latreille, 1804). Comparative Cytogenetics 16(4): 211-242. https://doi.org/10.3897/ CompCytogen.v16.i4.90558] ότι ενα νέο είδος το Polyommatus lurae βρέθηκε στην Αλβανια, το οποίο είναι πάρα πολύ όμοιο με τα P. orphicus eleniae και P. aroaniensis. Όλες οι καταγραφές του P. aroaniensis, σε αυτόν τον χάρτη πρέπει να επανεξεταστούν επειδή υπάρχει η πιθανότητα να υπάρχουν κρυπτικά είδη.

6. *Polyommatus orphicus*

   - Polyommatus orphicus eleniae, a new subspecies as suggested by VISHNEVSKAYA MS, SAIFITDINOVA AF, LUKHTANOV VA (2016): Karyosystematics and molecular taxonomy of the anomalous blue butterflies (Lepidoptera, Lycaenidae) from the Balkan Peninsula. Comparative Cytogenetics 10(5): 1– 85. https://doi.org/10.3897/ CompCytogen.v10i5.10944. Very similar to P. aroaniensis; see photos of P. eleniae in pages 296–297 of the book the Butterflies of Greece (2009).
   - Polyommatus orphicus eleniae, το οποίο έχει προταθεί με το VISHNEVSKAYA MS, SAIFITDINOVA AF, LUKHTANOV VA (2016): Karyosystematics and molecular taxonomy of the anomalous blue butterflies (Lepidoptera, Lycaenidae) from the Balkan Peninsula. Comparative Cytogenetics 10(5): 1–85. https://doi.org/10.3897/ CompCytogen.v10i5.10944. Μεγάλη ομοιότητα με το P. aroaniensis. Δέστε για φωτογραφίες του P. eleniae, στις σελίδες 296–297 του βιβλίου Οι Πεταλούδες της Ελλάδας (2009).
